

Graduated from **SOH** training

Our SOH is fully trained and ready to support you

The Spreekuur Ondersteuner Huisarts (SOH) is a qualified healthcare professional within the GP practice, capable of independently assessing and treating patients for specific complaints while working under the GP's overall responsibility.

A SOH may have a background as a medical assistant, practice nurse, or registered nurse. They have undergone further medical training to treat specific complaints. With this training, the SOH independently assesses situations, provides appropriate care, and helps maintain order in the practice.

In our team, everyone focuses on their area of expertise. Together, we provide high-quality care.
