

A SOH

is currently being trained here.

We actively support the growth and development of primary care.

The Spreekuur Ondersteuner Huisarts (SOH) may have a background as a medical assistant, practice nurse, or registered nurse. In addition, the SOH receives additional medical training to treat specific complaints. The SOH independently assesses situations, provides appropriate care, and sees patients independently while remaining under the overall responsibility of the GP.

In our team, everyone focuses on their area of expertise.
Together, we provide high-quality care.

The SOH training is
