

Our team is strengthened by a **SOH**

Spreekuur Ondersteuner Huisarts (SOH)

A SOH is a trained healthcare professional within the GP practice who runs their own consultation hours for specific complaints, independently assessing and treating patients under the supervision of the GP.

A SOH may have a background as a medical assistant, practice nurse, or registered nurse. They have received additional medical training to manage specific complaints. The SOH independently assesses situations, provides appropriate care, and helps maintain order in the practice.

In our team, everyone focuses on their area of expertise.
Together, we provide high-quality care.

The SOH training
